

Open Channel Flow Meter Rentals Short-Term or Long-Term Monitoring Applications

Flo-Dar Flow Meter — Flo-Dar's non-contact sensor eliminates fouling and is ideal for flows with high solids content, high temperatures, caustic flows, large man-made channels, surcharges, shallow flows, and virtually any defined conduit or circular pipe.

Sigma Flow Meters — Choose from the industry's most popular family of portable and permanent flow meters that offer you a choice in sensor technologies. Sigma meters consistently deliver accurate data with a minimum of operator field time.

Flo-Mate Flow Meter — Lightweight, rugged field construction with no moving parts, water resistant electronics, data storage/recall capability, battery operation, and fixed period averaging make Flo-Mate the clear choice in velocity flow meters.

Why Rent Directly from Hach?

- All flow meters are factory calibrated and tested before shipment.
- Unlimited, unparalleled, free technical support via telephone, email, or fax.
- Weekly and monthly rental rates are available.

Rent-To-Own Program

- Option 1 allows you to purchase the equipment you are currently renting. We will apply 70% of your total paid rental fees toward the current list price of the instrument. A six-month warranty is included.
- Option 2 allows you to purchase a new Hach flow meter, comparable to the one you are currently renting. We will apply 35% of your total paid rental fees toward the current list price of a new instrument.
